

# Bubble Up Fun Instructions

The mixing instructions are critical but not complicated

1. Pour 1 gallon of distilled water into your container, bowl, or bucket.
2. Slowly empty Bubble Up Powder into the water
3. Mix the Bubble Up Powder into the water until there are no clumps
4. Mix in the Bubble Up Juice (Dawn Ultra Soap) into the water and powder slowly to avoid any foaming
5. For best results let the solution rest overnight.
